

(A)
I have it been able on yr behalf but havent yet had time to
copy things out. The Bramptons of Norfolk dont seem to have
come from Guy de Brampton. I enclose the Corbet connection
with the latter & the pedigree of your Bramptons which
dies away too early for your woman. I will see what I
can do to get it up to her generation, but will have to
wait till I am in London. There were 5 pedigrees of
Bramptons in the Norfolk Vis: but this one bears the
arms as of your Bohun chart - the others dont, except
one which is 'differenced' - You can safely say that the B's
of Letton were the progenitors of your B. of Pulham & Mary M.
It has been such a chaotic & busy summer that I have had to
reflect my genealogy rather but will send you pedigree of Ayala
the ancestor of Blount. I get them on several of my 'lines' -
& have made exhaustive searches in order to get them as right as is
possible -

Congratulations on arrival of a sister of the Princess. How another
poem on Fenner's 2nd. 'Fathers Day?' - What fun having a new baby
in the family - you are very lucky -
